

Attractive Jobs for ICT

Philippe Saint-Aubin,
Chairman of the ICT Sector Committee,
industriALL Europe

ATTRACTIVE JOBS FOR ICT

- It all starts with a mapping exercise
 - Current people (too often laid-off)/skills vs. future jobs
 - IndustriAll ready to take the challenge... **with support**
- We need jobs attractive to workers and students (STEM)
- Training is a life long process with career progression
 - Push transferable training, not proprietary technologies
 - Training schemes and qualifications should be pan-European
- Social dialogue between workers and employers is the key to success. **See CEEMET + IndustriAll**

A EUROPEAN INDUSTRIAL POLICY FOR ICT

- EU lags behind the USA and Asia
- Digital 2020 (modest) objectives may not be met
- **EU needs to push an active industrial policy on:**
 - Skills
 - Research & Development
 - Standardisation
 - Regulation
 - Security
 - Broadband Deployment
